Browser Cache

This is a temporary storage spot for web pages. Your browser saves the data you need to view a website. This makes your second visit faster than your first.

Cart Abandonment

Have you ever added an item to your cart and never ended up buying it? This is called cart abandonment.

Virtual Private Network

Have you ever wanted to use the Internet at Starbucks, but get worried about security? Having a private network means you can connect from anywhere. You get the benefits of heightened security, too!

Minimize the current window

On a PC: Press 'Windows key' and 'down arrow'

On a Mac: Press 'Command' and 'M'

Sometimes, you need to shrink the window you're working in. If you don't want to close it, try this tip. That way, you can focus your attention on one window.

Minimize all windows

On a PC: Press 'Windows key' and 'M'

On a Mac: Press 'Alt' and 'Command' and 'M'

What if you want to switch from Google Chrome to Microsoft Word? You might want to keep your Internet tabs up. This will shrink all the windows you have open. Then, open the one you want!

Run an application

On a PC: Press 'Windows key' and 'R'

On a Mac: Press 'Command' and 'M'

To get an application up and running, try these quick shortcuts.

Redo the last operation

On a PC: Press 'Ctrl' and 'Y'

On a Mac: Press 'Shift' and 'Command' and 'Z'

If you need to repeat an operation multiple times, then try this time-saver.
